ViewProof UI-UX Screen Specification

Version 1.1 — every screen specified twice: Mobile and Desktop. Handoff for external redesign. Must preserve: evidence-first honesty, 16px-min type, 48px-min targets, one primary action per screen, no generic 'Verified' badges.

0. Global shell, tokens, rules

0.1 Shell

- Mobile: sticky floating glass pill (brand tile + name left, solid Sign-in pill right), content 16px padding, footer centered.
- Desktop: same pill stretches to max-w-6xl with full nav (Dashboard · Agent · Review · Sign in); footer same, wider.
- PWA install nudge (first eligible visit, dismissable): row card with text + solid Install + ×.
- Canvas: sand + faint fixed brand blobs; cards frosted white 78%, controls 55%, hairline borders, soft shadows; safe-area padding.

0.2 Tokens

Token	Value	Use
ink-900	#14213D	Text/headings
proof-green-600 / -100	#177E5C / #DCF5E8	Primary CTAs / confirmed
sun-500 / sun-100	#F6B844 / #FFF2CF	Accents, code/offline panels
coral-500 / coral-100	#E66D5A / #FDE5E0	Report/destructive/warnings
sky-500	#327CCB	Links, back-links, info
sand-100	#F7F3EC	Canvas, inset panels
Type	Display 32 / H1 26 / H2 18 / Body 16 / Small 14 / tabular numerals	Inputs always 16 (no iOS zoom)
Targets	≥48px buttons/links; 56–60px option rows; 44px icon buttons	
Radius	Cards 16 / controls 12 / pills 999	
Motion	220ms ease; hover-lift precise pointers only; reduced-motion + reduced-transparency fallbacks	

0.3 Shared components

- HelpFooter (bottom center, slate): 'Need help? WhatsApp the agency — a person replies.' + contact when known.
- OfflineNote (sun, centered): 'Offline? Saved passes still open.'
- EmptySlots (sand, centered): bold title + one line + [Notify me on WhatsApp] wa.me link.
- PausedNotice (slate): bold 'Paused for now' + one line + [Notify me on WhatsApp].
- Back link (staff subpages, top-left, sky semibold 44px): '← Dashboard'.
- Badges (pill 14px bold): green Active/Confirmed/paid · sun Requested/pending · coral Stale/Paused/NeedsReview · slate rest.
- Symbols: ✓ confirmed · 🥇 score · 🌱 new · ⚠️ 🔒 info · 🎉 stale · 🤝 locked · success · reliability · ✍️ terms · 📜 export · 🧭/🛠️ states.

0.4 Content laws

- No 'Verified' badges. Exact dates only. One primary action per screen. Errors are human sentences with a next step. Buyers never type IDs (links prefill).

1. Home — / (public)

Mobile (<640px)

- Stacked hero: eyebrow, H1 34px, 18px sub ('Fresh cards. Named hosts. Free WhatsApp booking.'), two full-width 18px CTAs (agency solid / hosting frosted).
- Example card panel below; 3 how-it-works cards stacked; honesty footer line.

Desktop (1024px+)

- Two-column hero (pitch left, live example card right, H1 48px); CTAs side by side; how-it-works 3 columns; footer centered max-w-2xl.

States & notes

- No states; purely presentational.

2. Viewing Card — /c/[slug] (public, SEO)

Mobile (<640px)

- Single glass card, gallery (208px) over details; title 26px, area, 20px price; 2-line evidence (fresh+host, score/new-agency); 'More about this card' expander (photo date, title-not-checked, viewing count); BookForm stacked (slot radios, name/phone, optional budget/move-date, consent checkbox, sticky bottom solid CTA).
- Paused → PausedNotice instead of form. Report link, AskBox chat, HelpFooter below.

Desktop (1024px+)

- Card splits gallery (420px min) left + booking panel right (max-w-5xl); slot radios 2-col; budget/move-date side by side; sticky CTA becomes static; chat and footer same order.

States & notes

- Bad slug → 'Hmm, this card is gone…' + Back home. No slots → EmptySlots. Paused → notify via wa.me.

3. Viewing Pass — /b/[id] (holder link)

Mobile (<640px)

- Centered card: green status line, 22px listing, area, 18px date, host line; sun code panel ('Code is on WhatsApp — show it at the venue.' + expiry); stacked [Add to calendar] + CancelButton; report link; OfflineNote; HelpFooter. Code NEVER rendered.

Desktop (1024px+)

- Same card capped at lg centered; calendar + cancel side by side; rest identical.

States & notes

- Bad id → 'Can't find this pass… newest WhatsApp link is right.' Cancel → status text, slot freed. Completed → status line + report link.

4. Report — /report (public, prefilled)

Mobile (<640px)

- Glass sheet: H1 24px + one-line sub; linked arrivals hide IDs behind green 'Linked to your viewing ✓' strip (walk-ins get two ID inputs); seven 60px radio rows (bold label + hint, selected green); optional free text; camera photo button + 'Photo added ✓'; sticky coral Send.

Desktop (1024px+)

- Same sheet capped at lg centered; radios stay single-column (thumb rhythm preserved on desktop).

States & notes

- Missing ID → inline prompt. Success → server message. Photo failure → 'send without it' fallback.

5. AskBox chat (in card) — /c/[slug] §

Mobile (<640px)

- Sand panel: bold title + 14px honesty line; 4 wrap chips (44px pills); thread (green-right buyer, white-left answers); 48px input + solid Ask; Enter-to-send.

Desktop (1024px+)

- Identical, full panel width; chips wrap in more columns.

States & notes

- Network fail → '…check your network and try again.' in-thread.

6. Agent login — /agent/login

Mobile (<640px)

- H1 'Hello 👋' + one-line how-to; labeled tel input (+234 placeholder); solid WhatsApp-code button; 6-box code input (2xl tracking, otp autocomplete); verify button; status line; then solid 'Link my agent spot →'.

Desktop (1024px+)

- Same column capped at lg centered.

States & notes

- Wrong code → friendly retry text; unrostered number → claim explains owner must add it.

7. Agent day + check-in — /agent

Mobile (<640px)

- H1 + one line; loading/sign-in states; Today's viewings as tappable rows (bold time · title · buyer; 14px status + reliability + 'Your cut: terms'); tap loads ID + focuses code.
- Labeled Booking ID + giant 3xl code inputs; solid 20px Confirm; 'Didn't happen?' + 3 stacked outcome buttons; green receipt panel; Report; push-bell button + status; sun offline line.

Desktop (1024px+)

- Same column capped at lg; outcomes go 3-across.

States & notes

- 5 wrong codes → review flag. Offline → queued + reassurance.

8. Owner login + Onboard — /login · /onboard

Mobile (<640px)

- Login: 'Welcome back 👋' + email OTP, no passwords; labeled inputs; solid send/verify; → /onboard.
- Onboard: 'Set up your agency 🏠' + agency name / WhatsApp / comma areas; solid Create → /dashboard/listings; signed-out + has-agency states with buttons.

Desktop (1024px+)

- Both capped columns centered; identical fields.

States & notes

- Send/verify failures as sentences with retry.

9. Dashboard — /dashboard

Mobile (<640px)

- Header row (H1 + frosted Export CSV); full-width conditional banners (coral lock; green 1-of-3 next-step with solid CTA); stacked glass sections: listings (counts + manage + stale alert), today (counts + open), scorecard rows + team link, issues + triage link.

Desktop (1024px+)

- Sections in 2→3-col grid; banners span full width; checklist CTA inline.

States & notes

- Loading text; suspended lock banner; empty scorecard/issues lines.

10. Listings manager — /dashboard/listings

Mobile (<640px)

- Header + back link; H1 + one-liner; [+ Add a place] + [Import CSV] toggle buttons.
- Create glass form (stacked → 2-col desktop): title/type/area/price/host → Save draft.
- CSV glass panel: column guide, mono textarea + file picker, Import as drafts, per-row results.
- Listing cards: title/area/price/badge, 14px meta (date · host · ✍️terms), full-width Edit toggle; edit sheet (photo grid + camera, taken-on date cap today, price, host, terms input, Save); status buttons (Reconfirm/Publish with raw gate errors/View/Pause); slots expander (rows with taken counts + 44px ×, datetime + Add).

Desktop (1024px+)

- Cards 2→3-col; forms 2-col; edit sheet same fields; tables never used (cards persist).

States & notes

- Empty → free-cards nudge. Publish gate errors shown verbatim. Slot delete blocked with human reason when held.

11. Bookings inbox — /dashboard/bookings

Mobile (<640px)

- Header + back link; H1 + one-liner; frosted ledger-export button + purpose microcopy.
- Upcoming cards: title + badge, tabular time, buyer + phone, reliability line when known, area · host; Message buyer (wa.me prefilled) + Confirm/Decline/Cancel.
- 'Recently done' cards: title, buyer · host, time; close box (price input + Close deal) → closed state (price + payout Pending + owner Mark paid / paid ✓).

Desktop (1024px+)

- Cards 2→3-col; close box stays stacked inside cards.

States & notes

- Empty upcoming/history lines; action errors as sentences; list refreshes after each action.

12. Team — /dashboard/team

Mobile (<640px)

- Header + back link; H1 + one-line number rule; statuses.
- Add-host glass form (stacked → 3-col): full / public / WhatsApp number → solid Add; success tells owner the link-spot step.
- Roster cards: public (full), tabular phone, Active ✓/Inactive.

Desktop (1024px+)

- Form 3-col; roster 2→3-col.

States & notes

- Loading vs nobody states; validation per field.

13. Review queue — /review

Mobile (<640px)

- Header + back link; H1 + 'Conflicts and reports. Humans decide — nothing automatic.'; loading vs calm-empty states.
- Queue cards: 'category · status', detail, timestamp; 1-col 52px action stack (looking-into / Fixed ✓ / Dismiss).

Desktop (1024px+)

- Cards 2→3-col; actions stay stacked (deliberate, unhurried).

States & notes

- Unauthed → sign-in prompt. Actions confirm via status text + reload.

14. Landlord office — /admin

Mobile (<640px)

- H1 + 'All shops, one screen. Lock doors, keep records.'
- Agency cards: name + badge, tabular contact, 14px meta (owner · counts · since); full-width Lock (confirm dialog) / Reopen.
- Person-lock panel: email + reason, red Lock + Unlock; guidance prefers shop-lock; admins unbannable.

Desktop (1024px+)

- Cards 2→3-col; lock panel fields inline.

States & notes

- Non-admin → 'Landlord only' message. Actions confirm + reload.

15. Not-found + Error — 404 · error boundary

Mobile (<640px)

- 404: centered glass card, 🧭 48px, 'Lost your way?', bookings-safe line, solid Back home, HelpFooter.
- Error: 🛠️ 'That hiccuped', nothing-lost line, solid Try again + frosted Back home.

Desktop (1024px+)

- Same cards centered; identical copy.

States & notes

- No technical text ever (no codes, no stacks).

16. Placeholders, images, icons

Element	Mobile	Desktop
Listing photo	16:9 cover, 208px h, eager	Same file, 420px min, left column fill
Photo placeholder	Sand panel 160px, centered line	Full-height panel, same line
Edit thumbs	80px grid + 36px ×	Same (touch-first even on desktop)
Brand tile	36px green rounded-xl, white V	Identical
PWA icons	192 + 512 maskable + 180 apple-touch; green disc, white ring, green check	Same assets
Empty/error art	Emoji-led, calm panels	Identical, centered

17. Breakpoint behavior map

Range	Layout rules
<640	Single column; sticky bottom primary CTAs; 16px gutters; pill header = brand + Sign in; option rows full-width.
640–1024	2-col options, dashboards, queues; pass actions side by side; forms stay readable width.
1024+	Full nav; hero 2-col; card gallery+panel; 3-col ops grids; sticky CTAs static; task forms capped lg centered; review actions stay 1-col by design.

18. Journeys (all users, all phases)

Buyer (7 phases)

1. Discovers link → card (mobile-first entry).
2. Judges: price, exact date, host, score, disclaimer.
3. Books via form → pass (code on WhatsApp).
4. Confirm + 24h/2h reminders.

5. Shows code; receipt via WhatsApp.
6. Reports via prefilled link if mismatch.
7. Cancels via pass or CANCEL; slot freed. Branches: stale→notify; no slots→notify; bad link→404.

Agent (6 phases)

8. Rostered → OTP login → Link spot.
9. WhatsApp alert + push per booking.
10. Day list → tap → code → Confirm (or honest outcome).
11. 5 wrong codes → review flag.
12. Offline queues + syncs.
13. Sees reliability + cut on each row.

Owner (8 phases)

14. Email login → onboard (name, WhatsApp, areas).
15. Checklist banner 1-of-3 until live.
16. Team by exact numbers; listings add/import; photos/date/price/host/terms edit.
17. Slots per listing; publish (gates enforced).
18. Freshness: auto-pause + nudge + 1-tap reconfirm.
19. Inbox: message/confirm/cancel; close with naira; mark payouts.
20. Proof: scorecard, ledger CSV, Fresh Score, weekly summary; exports on demand.
21. Suspended state banners + support path.

Reviewer + Admin

- Reviewer: triage queue + evidence accept/reject; human-only, audited.
- Admin: suspend/reactivate (cards vanish, history stays), ban/unban people; allowlist-gated.

19. Redesign constraints (law)

- Copy honesty: exact dates, named hosts, title disclaimer, no 'Verified' badges, receipts = observed facts.
- Ergonomics: 16px min (inputs always), 48px targets, focus rings, reduced-motion/transparency, 4.5:1.
- Flow: one primary action/screen; buyers never type IDs; staff pages link back; new owners get exactly one next step.
- Responsive: mobile single-column thumb-first; desktop expands to columns without shrinking text/targets; review actions stay stacked deliberately.
